Ubiquiti Nanostation M3
and Picostation.

Summary

I was born in Iran in 1993 and moved to Italy at the age of 7. I started studying programming languages at the age of 15 and began to work as a freelance programmer a couple of years later. At the age of 19 I was admitted to the University of Pisa as a Computer Engineering student. After finishing my bachelor I enrolled for a Master in Artificial Intelligence and Data Engineering. In the past years, beside studying for my examinations, I worked for IT Companies and for the Italian government, I took part in group projects and tried to startup my own ideas. During the academic year 2017/2018, my goals have shifted. I have developed a deep interest in Artificial Intelligence. Precisely, what really keeps me up at night is the complexity behind creating a mathematical model (to be translated into a computational architecture) capable of independent decision making and of generating original thoughts. To this very specific end, is the von Neumann architecture good enough or should a new one be conceived? Is it mainly a problem of programming? Finally, as said by Alan Turing in his seminal paper Computing Machinery and Intelligence, can machines think?

Education

2019 - 2020	Master of Engineering Studies - Artificial Intelligence	University of Pisa, Italy
2013 - 2019	Bachelor of Engineering Studies - Computer Engineering	University of Pisa, Italy
2008 - 2013	High School Diploma 100/100 - Scientific Lyceum	Scientific Lyceum "G. Spano", Italy

Personal Studies

The following is a list of in-depth courses which I followed during my Bachelor of Engineering.

Complete Java Masterclass: Learn to master Java 8 core development.	Tim Buchalka
The Complete Networking Fundamentals Course: Start your journey to CCNA.	David Bombal
Cisco Networking Fundamentals: Complete Cisco IT Networking Fundamentals course.	Keith Gebhardt
Understanding Modern Electronics.	Professor Richard Wolfson, Ph.D
Advanced C++ Programming: Intermediate to advanced C++, including C++ 11's additions.	John Purcell
Machine Learning: Hands-On Python & R In Data Science.	Kirill Ereminenko, Hadelin de Ponteves
Introduction to Computer Vision I Master OpenCV 3 in Python.	Rajeev Ratan
Artificial Intelligence: A Modern Approach I.	Stuart J. Russell, Peter Norvig, F. Amigoni, S. Gaburri
Artificial Intelligence: A Modern Approach II.	Stuart J. Russell, Peter Norvig, F. Amigoni, S. Gaburri

Work Experience

2018	ClassX S.r.l. <i>Java Developer</i> I worked as Java developer for the ClassX S.r.l focusing to develop broadcasting software and hardware. I got a glimpse of what it means to work with Modern OpenGL, writing native drivers for custom broadcasting hardware as well as using JNI.	Pontedera
------	---	-----------

Operating Systems

Windows 7/8/10, Mac OS X, iOS, Android, Debian, Linux Mint, Arch Linux, Raspbian, OpenWRT, Kali Linux, Parrot OS, Tails.

LinkedIn

For full and detailed information regarding my work experience, projects and awards please refer to my

LinkedIn Profile:

it.linkedin.com/in/rambodrahmani.

GitHub

"Sharing isn't immoral - it's a moral imperative. Only those blinded by greed would refuse to let a friend make a copy."

github.com/rambodrahmani.

Academia.edu

For full and detailed information regarding my personal studies please refer to my

Academia.edu Profile:

pisa.academia.edu/RambodRahmani.

2018

ClassX S.r.l.

Internship

I spent two months at ClassX S.r.l as part of my academic career as a Computer Science student at University of Pisa. I developed an Android Application used to receive SMS messages and forward them to the company software for broadcasting purposes.

Pontedera

2013 - 2016

System Administrator

Rambod Rahmani

I was involved in in-home Server Setup as part of our self-educating projects at EigenLab. Additionally I spent a great deal of time working on both dedicated servers and VPS (OS Installation, ISPConfig Setup and maintenance). The majority of my experiences as SysAdmin was focused on Linux Servers.

2014 - 2015

Boccaccio Club

Pisa, Italy

Software Programmer

Boccaccio Club iOS and Android App Development. Wireless Network Routing with Multiple Access Points: internet access is guaranteed only when the Boccaccio Club App is installed on your device. In order to achieve such an advanced authentication method I developed a custom captive portal named DYNAMO.

2015

PHOS Project

University of Pisa

Software Programmer

iOS and Android App development for PHOS Project (Aerospace project at University of Pisa part of the REXUS/BEXUS programme).

2013

Ciclope: Raspberry Pi based Humanoid

Rambod Rahmani, Giacomo Taormina

Software Development & Hardware Assembly

Ciclope is a Humanoid robot with the ability to see and analyse the external world using a camera. Its structure has up to 17 degrees of freedom. It is a one-of-a-kind combination of Software and Hardware: it combines the latest OpenCV libraries and the RPi on board camera. I coded basic functionalities such as object-tracking and face-recognition, and its control interface using Python, C and C++.

2013

Ambulatory Proctology Office

Sardinia, Italy

Software Programmer

I developed a software named "Anamnesi" (Objective-C - MAC OS X) used to manage patients medical histories. Each patient is identified using his fiscal code and the ambulatory doctors are able to access all medical histories stored on a server wherever they are.

2012

MALIBU Village

Canet-Plage, Languedoc-Roussillon, France

Internship

I worked as IT Support at MALIBU Village as part of the "Leonardo Project" internship. This was the first time I had a hands-on experience with Ubiquiti Picostations.

2010 - 2012

Italian Navy

San Giorgio-class amphibious transport dock, Italy

Software Programmer

I coded a set of three software named **A.S.C (Acceptance, Sorting and Control)** for the Italian Navy. What started as a late night project to improve my coding skills ended up changing my life for ever when I was still a high school student. During more than two years of daily work I translated a NATO publication made in 2008 into machine language. Thanks to A.S.C. operators do not have to worry anymore about formatting and standardizing their messages: the software checks every line before sending the message and tells the operator how to correct any mistake.

3D Printing

- Geeetech Prusa i3 Pro B
- Anycubic I3 Mega
- Creality Ender 3 Pro
- Anycubic Photon

OpenWRT

As a member of EigenLab, a local hacklab in Pisa, I was involved in installing and configuring the OpenWRT Distribution on embedded devices that we used to build EigenNet: a local **Wireless Mesh Network** in the city of Pisa.

Bitcoin

I have been involved in Bitcoins as far as it regards Bitcoin Mining (CGMiner, CPUMiner, USB Miners), Mining Pools, Bitcoin Wallet and Full Bitcoin Node Configuration (Bitcoin Core).

Places

Iran, Italy, Germany, Spain, France, Belgium, Holland, Russia.

Awards, Scholarships and Certificates

- | | | |
|-------------|--|--|
| 2013 - 2016 | DSU Scholarship | DSU of Tuscany |
| | DSU Scholarship by DSU of Tuscany supporting my Bachelor of Engineering Studies. | |
| 2013 - 2016 | Italian Ministry of Education, University and Research Scholarship | MIUR |
| | Excellence Scholarship by MIUR supporting my Bachelor of Engineering Studies. | |
| 2012 | Intel Excellence in Computer Science | Intel Corporation |
| | Awarded to Rambod Rahmani for developing the A.S.C. Software. | |
| 2012 | National Excellence Registry | Italian Ministry of Education, University and Research |
| | Awarded to Rambod Rahmani for developing the A.S.C. Software. | |
| 2012 | Certificate of Merit | Scientific Lyceum "G. Spano", Italy |
| | Awarded to Rambod Rahmani for developing the A.S.C. Software. | |
| 2012 | Europass Mobility Nr. IT/00/2012/859/10 | |
| | Gymnasium Lyceum "D. A. Azuni" and ALFMED (Académie de Langues France Méditerranée.). | |
| 2011 | A.S.C. Software | Italian Navy - San Giorgio-class Amphibious Transport Dock |
| | Software Development Certificate by the Italian Navy for developing the A.S.C. Software. | |

Patents

- | | | |
|------|---|--|
| 2015 | DYNAMO | Ministry of Economic Development (Italy) - Request number: 102015000072776 |
| | Captive portal software which allows for Wi-Fi Access Points to be configured so as to provide internet access only to those devices where a required iOS/Android App is installed. Otherwise the device only has internet access as far as it is needed to install the required App. I developed this custom Captive Portal in order to achieve the advanced authentication method required by Boccaccio Club and thanks to their financial support I was able to patent DYNAMO. | |

Events

- | | | |
|------------|--|---|
| May 2015 | International World Wide Web Conference 2015 | Florence, Italy |
| | Research, development, and applications of the topics related to the Web. | |
| May 2015 | HEUREKA 2015 | Berlin, Germany |
| | One of the main founders conferences in the German--speaking world. | |
| May 2015 | Berlin Talent Summit 2015 | Berlin, Germany |
| | Europe's leading recruiting conference for high-potentials. | |
| July 2012 | 9th EXPO-SCIENCES EUROPE 2012 (ESE) | Tula, Russia |
| | 9th MILSET Expo-Sciences Europe (ESE 2012) held in Tula, Russia. | |
| April 2012 | I Giovani E Le Scienze 2012 | Federation of Scientific and Technical Associations |
| | The A.S.C. Software was selected as one of the best 30 in the whole country. | |

Interests

Professional: Startup, Computer Science, Geolocation Systems, Hardware, Smartphones, iOS, Android, Embedded systems, Web development, App development, Software design, Networking, Linux, Hacking, Penetration Testing, Computational Complexity, Artificial Intelligence, Artificial Neural Networks, Computer Vision.

Personal: Running, Chess, Cosmology, Astronomical observations, Quantum Computer Science, Physics and Math.
